

To help combat the Coronavirus epidemic, we have developed a simple to use 'traffic light' style product which automatically, and accurately, measures the amount of people in your store.

Our stereoscopic cameras measure the amount of customers that have entered and exited your stores, allowing you to keep your visitor numbers at a safe, manageable level.

With no need for extra staff, our system allows you to free up resources and save money by not having to hire dedicated personnel to manage the doors.

Technical Specification	
Maximum Coverage	11.55m x 8.66m @ 20.00m
Minimum Coverage	2.26m x 1.46m @ 2.5m
Power/Connectivity	PoE Class 0 – 6W – IEEE 802.3u
Dimensions	13.0 x 9.4 x 3.0cm – 250g
Required Illumination	2 Lux
Mounting	Various Ceiling Mounting Options

The cameras have a wide coverage range ensuring no customers are missed as they enter your premises.

They require wired internet access to operate but 4G can be provided for areas a wired connection isn't possible.

The tablet - or internet enabled display, receives a message from our servers, instructing your customers to enter or to wait until store occupancy has reached a safe level.

To find out how we can help you during this unprecedented time, please contact us to discuss your individual requirements.
